Dealer Management System

Dealer Management System (DMS), represent a sophisticated SaaS solution engineered to streamline distribution / principal interactions. Our one-stop platform, with streamlined order management, real-time tracking and power analytics, will make your business more efficient and profitable.

Main Features:

Order Entry

Simplify sales order placement with an intuitive interface that ensures quick and accurate submissions by distributors.

Order Review and Processing

Principals can seamlessly review and approve orders, transitioning them to production with minimal delay.

Dispatch Management

Efficiently manage logistics by entering container numbers for dispatch, allowing distributors to confirm receipt effortlessly.

Automatic Inventory Updates

Stock levels update in real-time as orders are received, providing distributors with accurate inventory management without manual input.

Secondary Sales Management

Track secondary sales effortlessly, enabling distributors to monitor performance and assess stock levels with precision.

Seamless SAP Integration

Integrate effortlessly with SAP to synchronize all sales orders, dispatch details, and customer information for cohesive reporting.

Role-Based Access Control

Enhance security and usability with distinct roles—Admin, Principal, and Distributor—each tailored with specific permissions.

Document Management System

Dealer Management System (DMS), represent a sophisticated SaaS solution engineered to streamline distribution / principal interactions. Our one-stop platform, with streamlined order management, real-time tracking and power analytics, will make your business more efficient and profitable.

Setup Features

Catalogs: It helps you to categorize the documents & easily enhance visibility and ease of navigation. **Categories:** Sort documents out to help in finding (search) and organizing them. **Document Types:** Document types allow you to define types of documents (e.g., report, contract) to streamline upload and management. Document Upload and Sharing **Simplified Upload:** Users can easily (re)upload any documents that are required for an application. **Departmental Visibility:** Once added, the documents can be viewed by other employees of concern departments. This enables a transparent environment to work in. **Read Permissions:** If you wish to showcase any document only employees who have Read Rights can view this and thus secure the information up till its optimum.

B2b Kenya

JM Innovatech Solutions launched Kenya's first Business-to-Business Portal B2Bkenyan.co.ke in September 2024. This extremely advanced state-of-the-art portal provides a bridge between the exporters and international buyers. B2Bkenyan has various broad categories that encompasses almost every business type. Exporters can subscribe to this portal by filling up the information form that is available on the site. Once the exporters register themselves on B2Bkenyan, their profiles are automatically populated on the site, hence allowing millions of viewers to reach the exporters.

This portal has already been registered and optimized on various search engines including Google, MSN and FAST (All the web). Therefore, B2Bkenyan provides an excellent opportunity to the exporters to share their profile and products with international buyers, who visit search engines regularly. We believe that B2Bkenyan can have a tremendous effect on the overall economy of the country by boosting up the total exports of kenyan.

Time Manager

Time Manager is an enhanced personal / HR system with full recording and reporting features for such vital issues as time and attendance, employee history and leave records for your main office and it's multiple locations.

Features

- Managing different number of shifts
- Rotations (groups and individuals)
- Time Entry (employee and date wise)
- Shift Setup
- Overtime Calculation
- Employee Temporary Cards
- Process Database (flat file system, direct from database etc.)
- Number of time reports on the basis of daily, monthly and yearly
- Graphical reports

The system uses company-defined rules & policies to calculate the time of each individual employee which can then be passed to the payroll system for processing payments. This reduces the administrative effort of an organizations involved in payroll preparation.

JM Innovatech Solutions

Web Services

Domain / Hosting

We have achieved excellence in the latest web technologies to provide you a better web domain and hosting plans.

Web Application Development

JM Innovatech Solutions has a wide experience of web application designing and it provides professional web application designing services that suits the requirements of companies and reflects their proper image. Web Application Design service does not mean simply creating a web presence on the net but it is a responsibility to portray the right image and the message that the client intends to communicate to its customers. We have achieved excellence in the latest web technologies to provide you with dynamic data base oriented web sites and high end e-commerce solutions. Our sites are designed keeping the target audience in mind for easy product description and faster sales. In order to deliver the right image, we pay special attention to even the minute details while designing the website. To make the site unique and attractive, we also make use of multimedia using Adobe Photoshop, 3D Studio Max, Real Audio, Real Video and Macromedia Flash.

Offshore Web Application Development
